## Invitation Letter for Didactic Study Visit

with this letter, I would like to inform you that the Professorship of Economic Geology and Petrology at the Institute of Mineralogy at the TU Bergakademie Freiberg/Saxony offers the possibility of a two-week, didactic study visit. This offer is addressed to one academic teacher from your Institute who would like to improve his/her didactic skills in the field of *Economic Geology* and *Geology of Metal Deposits*. We can offer a working place for the candidate in our institute, full access to our analytical facilities (SEM, EPMA) and mineral collections for the study of ores, and participation in lectures and classes. Our faculty and SEG Student chapter would like to gain a presentation of the candidate concerning his/her own research issues. This Didactic Study Visit would be possible during the period of classes in 2023. Please take into account that the visit does not involve any financial benefit from TU Bergakademie Freiberg.

I will be grateful to you for considering this invitation.

Yours sincerely,

Freiberg, 18.01.2023

Prof. Dr. Bernhard Schulz
